Re: The way forward after the National Congress

It is important to clarify any misunderstanding regarding the process post elections after the Congress:

1. Directly after the National Congress on the 28th of August 2026 a meeting will be held between the Administrator and the elected leadership to confirm the way forward.
2. It is important to note that the Administrator remains the sole authority until the Registrar of Labor has filed the termination application with the Labor Court. The elected leadership has no decision-making powers without the authority of the Administrator until the final termination of the administration by the Court.
3. The day-to-day management of the Union shall remain the responsibility of the Administrator until the Labor Court has issued the final ruling.
4. The elected leadership shall commence with the Union operations subject to the authority of the Administrator.
5. All leadership proposals and or decisions that may have a material effect on the operations of the Union shall be authorized by the Administrator.
6. The financial access and bank accounts shall be handed over to the mandated leadership on termination of the final Labor Court ruling.

The above information is legally compliant and non-negotiable.

Members are urged to ignore the spread of misinformation by opportunists.
If any further information is required, you may contact the Administrator for confirmation.

Thank you,

Gerhard Vosloo
